

[How To Reduce Your Parts Handling Payroll](#) Feb 28, 2008 You have probably heard me make the comment that most auto and truck recyclers are about 15-20% overstaffed. At the same time you probably could not imagine how you could get by with fewer employees.

This video is designed to explain how this works in the parts handling portion of your business. We can do this at the same time we show the listener how to have more employee accountability. Folks we can't keep paying more and more for inventory, cut our prices to match other recyclers and stay in business unless we can pick up income somewhere else or reduce overhead. Learn how to get more done with less people by having better work flow and payroll utilization.
